# RONIT KENE

## JAVA AND WEB DEVELOPER

## PROFESSIONAL SUMMARY

Highly motivated and detail-oriented recent graduate, equipped with strong foundational knowledge in Java development. Adept at problem-solving, critical thinking, and eager to contribute to dynamic software projects. Proficient in object-oriented programming. Demonstrated ability to quickly learn new technologies and programming languages. Enthusiastic about pursuing a career as a Java Developer to apply academic learning and contribute to innovative and collaborative software solutions. Seeking opportunities to grow and thrive in a challenging and dynamic professional environment.

## PROJECTS

- /

### Student Record Management System (MVC)

A Java-based project employing the MVC architecture to efficiently manage student records in a MySQL database. Features include a user-friendly Swing GUI, JDBC for database connectivity, and support for CRUD operations (Create, Read, Update, Delete). This modular system ensures scalability and easy maintenance.
